Career Objective

As a dedicated Jr. MERN Stack Web Developer, I aim to leverage my skills and knowledge to contribute significantly to company projects. I aspire to grow into a Senior Developer role, bringing innovation and success to the team.

Skills

Technical Skills: HTML | CSS | Tailwind CSS (DaisyUI, Flowbite, MagicUI) | JavaScript(ES6) | React.js | Next.js | Express.js | Firebase | MongoDB | Python
Tools: GitHub | Git | npm

Projects

1. Pay-Path
Description: Pay-Path is a comprehensive payment processing application designed to simplify transaction management, user accounts, and agent activities. It provides a secure platform for cash-in operations, money transfers, and detailed transaction history tracking.
Key Features:
- Secure user password and identity management
- Payment management system
- Payment history storage
- Administrative management of users and apartments

Technologies Used: React, Tailwind CSS, DaisyUI, Express.js, MongoDB, Firebase
Links: Live Demo | Client-Site GitHub Repo | Server-Site GitHub Repo

2. LuxTower
Description: LuxTower is a comprehensive solution for managing a single building, making it easier for users, members, and administrators to handle all aspects of building management efficiently.
Key Features:
- Integrated payment method system
- Coupon usage system
- Administrative management of apartments and users

Technologies Used: React, Tailwind CSS, DaisyUI, Express.js, MongoDB, Firebase
Links: Live Demo | Client-Site GitHub Repo | Server-Site GitHub Repo

3. ProductFlow
Description: ProductFlow is a responsive e-commerce app built with React, Firebase, and Tailwind CSS, offering an intuitive interface for browsing, adding products to the cart, and seamless checkout.
Key Features:
- Find products by name
- Filter by category, brand, and price range (low to high and high to low)
- Product checkout and add to cart

Technologies Used: React, Tailwind CSS, DaisyUI, Express.js, MongoDB, Firebase
Links: Live Demo | Client-Site GitHub Repo | Server-Site GitHub Repo
